### **Freelance – web development**

JAN 2018 – 2019

- Built websites for few local businesses
- Helped photography studio business to build a website to showcase their albums, achievements & testimonials.
- Worked with a long term client to build a couple of websites for his charity and implemented Google analytics & online chat features.

### **Terias Consulting, Dehiwala – Software Engineer**

FEB 2021 – Present

- Designing and developing internal CRM software which is used by most of our clients.
- Developed a JavaScript based interactive search engine to visualize data & reports
- Designed and Developed static website for the company
- Developed a Wordpress website from scratch using Understrap framework for kindergarten
- Mostly my responsibility is to build filemaker or Javascript features for existing Softwares

## PERSONAL PROJECTS

### **Budgetbook**

[Github Repo](#) | [Live App](#)

- Purpose of this application is to allow users to track their expenses and incomes, Users have the ability to create multiple finance accounts such as (Personal, Banking, Investment)
- This project is open-source and available for developers under MIT license

- Easy adaptable frontend and backend filesystem (more details could be found in repository README.md file)
- UI components and layout structure is built with ANT Design library
- I decided to use Redux RTK Query for data fetching and cache management
- For Backend API and Database im using nodejs, Mongodb
- AWS Cognito & AWS s3 is being used for authentication & image upload
- This app uses AWS Cognito JWT tokens for authentication, in order to persist these tokens on client side i use httpOnlyCookies

## Portfolio website

[Github Repo](#) | [Live App](#)

- Static Website for showcase my work
- Technologies : Bootstrap, Sass, HTML, Vanilla JS
- I'm using Vite.js as the module bundler
